As Administrator of the agency’s Employment Security Division, I approve of this nomination. I see first-hand how having this demographic data, assists my staff in the planning, timing and delivery of services for the underserved areas in our state. This reformatted data has changed how much data we look at, how it has changed, how we focus and work. Ultimately, it is about how we can better serve our constituency, and having this data at our fingertips has been instrumental in how my division functions.

Kimberly Gaa, Administrator
Employment Security Division, DETR
