National Association of State Workforce Agencies (NASWA)
UI Information Technology Architect/Advisor

**Background on NASWA**

The National Association of State Workforce Agencies (NASWA) is the national organization representing all 50 state workforce agencies, D.C. and U.S. territories. These agencies deliver training, employment, career, and business services, in addition to administering the unemployment insurance, veteran reemployment, and labor market information programs. NASWA provides policy expertise, shares promising state practices, and promotes state innovation and leadership in workforce development.

**Background on CESER**

The Center for Employment Security Education and Research (CESER) is the leading education, research and information technology center focused on workforce development and unemployment insurance issues offering services to a diverse group of stakeholders, most notably state workforce agencies and their federal partners.

**Background on UI ITSC**

UI ITSC provides information, software tools, products and advisory services to states in support of information technology (IT) systems for the Unemployment Insurance program, to enhance efficiencies and promote the sharing and replication of successful UI models and practices.

**Brief Overview of Position**

The *UI Information Technology Architect/Advisor* will consult with states on the planning, procurement, development, implementation, and operation of Unemployment Insurance systems. This position works closely with the NASWA Technology Director to assist states as they reengineer their current business processes and move to modernize their Unemployment Insurance hardware and software infrastructure. The position reports to the NASWA UI Information Technology Support Center Director.

The UI IT Architect/Advisor is responsible for creating written reports and documentation, and oral presentations, for a variety of stakeholders.

The UI IT Architect/Advisor will regularly work with state workforce agency leaders and staff, the U.S. Department of Labor, NASWA management and staff, as well as a variety of stakeholders, and must understand the importance of these relationships. S/he must also have the ability to develop collaborative partnerships with Project Managers, IT professionals, vendors and stakeholders.

The successful candidate must be comfortable working on and with virtual teams.
Roles and Responsibilities

The tasks and responsibilities undertaken by this position include assisting states with strategic planning initiatives, RFI and RFP support, proposal evaluations, architecture, platform, and technology consultation, use case and requirements development, quality assurance support, and independent validation and verification during development of modernized UI components and systems. The creation of written materials and presentations is a substantial portion of the role.

Competencies & Skills

- Knowledge of and experience with oversight of business related technology projects;
- Knowledge of software design life cycle processes using iterative development model;
- Knowledge of project management and tracking systems;
- Knowledge and experience in software architecture and design for large complex multi-tier applications;
