Fiscal/Administrative	
Labor Exchange Tools	
Labor Market Information	X
Performance Reporting	
Training	X

<b>Description</b>	Career OneStop serves anyone involved with any aspect of employment, including offering 61 interactive tools. Some of the tools offered by Career OneStop include a database with education and training, certification, and licensing opportunities; an employer finder based on infoUSA's database of employers; special portals for ex-offenders, veterans, and young people; and an interest assessment and skill matcher that is based on O*NET data.
<b>Website</b>	<a href="http://www.careeronestop.org/">http://www.careeronestop.org/</a>

<b>Solutions Offered</b>	Career OneStop provides interactive tools to assist job seekers, job changers, students who might want further education, and those looking for education to skill up or get a better job.
<b>Availability</b>	Career OneStop is available to every state/U.S. territory.
<b>Organizational Governance Structure</b>	Career OneStop is supported by a grant from the U.S. Department of Labor's Education & Training Administration to the state of Minnesota's Labor Market Information department.
<b>Scalability with other WIOA Programs</b>	Scalable to other states/titles.
<b>Pilot Projects</b>	Career OneStop is working on renovating original tools, as well as a new veterans' job finder and a mobile app to support the veterans' TAP program. In April 2018, Career OneStop released a chatbot on the site which allows people to interact to find which tools and content pages they want to pursue. There will be two more phases to this project--Phase 2 will be a cleanup phase, and Phase 3 will be full artificial intelligence.
<b>User Training Opportunities</b>	Career OneStop offers one course and also provides webinars through work-force GPS. The website itself offers extensive Help information for each tool.
<b>Connectivity/Integration with other WIOA Systems</b>	Career OneStop offers web APIs for most of their tools. For example, Career OneStop has an occupational profile that pulls all of the information it has on that occupation as well as a job finder API; and it works closely with O*NET to provide access to their APIs. Career OneStop is well-integrated at the website and data use level and also provides downloads of most of its datasets that can't be found anywhere else.
<b>System Type</b>	Hybrid
<b>Licensing</b>	Dictated by terms & conditions
