GMS — State Agencies using Grant Management System (GMS)

COMPAS™ Compliance Audit System — State Agencies using or implementing COMPAS

COMPAS™
Compliance Audit System

Proven.
Secure.
Flexible.

Join the growing family of agencies sharing a common and robust UI Audit Tool.

Featuring:

- Data and audit consistency for staff, reviewers, and management
- Easy integration with both legacy and future systems through web services and/or direct data connection
- Built-in management reports
- Assignment/case management repository for file retention
- Integrated workflow and assignment tracking
- Flexible and intuitive design; effective for both new and experienced staff
- Generated correspondence specific to assignment type and state requirements
- Ability to attach supporting documentation
- Support of data import/export via CSV or Microsoft™ Excel files
- Assignment/Case review package created as PDF upon approval

For UI Tax Audit:

- Continuous TPS and Best Practice Quality edit checks
- Onsite use at the employer while disconnected from the agency's network
- 25+ Built-in management reports, plus a data warehouse for ad-hoc management analytics including Desired Levels of Achievement (DLA) progress monitoring
- Robust Employer Selection process with options matured from working with six states since first implementing for Maryland in 2013
- Built-in TPS Review process to allow the agency TPS team to securely review and score the annual Audit Universe audits within COMPAS — isolated from the audit staff through security

For Benefits Accuracy Measurement (BAM):

- Leverage of the standard SUN system "rec1.dat" file to create weekly BAM assignments
- Import of additional DCI "Before" data from the UI Claim
- Investigation Worksheets specific to the four case types (Paid Claim, Denied Claim-Monetary, Separation, and Non-Separation)
  - Supported Alternate Base Period analysis for Monetary eligibility
  - Continuous Quality Checks based on the ET400 BAM Operations Guide edits
  - Supported capture of Claimant Questionnaire (DOL)
  - Automated DCI results determined as the details and answers are entered on individual worksheets
