State Presence

(Visit [State Technology Profiles](#) for state contact information.)

Description	R.M. Wilson Consulting Inc. focuses on activities that contribute to the successful functioning of the U.S. labor exchange, with emphasis on specialty software and services tailored to meet the needs of the public (federal, state, and local) and private workforce systems
Products	Automated coding solutions, including O*NET-SOC AutoCoder, next-generation job search, including Enigma AJS, real-time labor market information, taxonomy development, refinement and linkages, pure and applied research, development of visionary workforce information systems, and design and usability testing of application interfaces.
Website	www.rmwilsonconsulting.com
Type of System	Hybrid
Intellectual Property (data, code, etc.) Owner	R.M. Wilson Consulting owns the intellectual property for the application logic; while the O*NET and SOC taxonomies are the property of the Department of Labor.
Extent system is customizable	We've created a number of custom versions of the application to meet the needs of commercial and government organizations.
Licenses the limit data usage/ dissemination?	Yes
State Agency Training	Video conference training
System Users Training	Video conference training
Integrate with social media	Yes
Scalable/integrates with other WIOA/workforce programs?	Yes
How is system interoperable with other systems?	O*NET-SOC AutoCoder provides a collection of web services that can be used to integrate our application with other systems.
Compliance with federal changes through...	Maintenance package
Additional Information	O*NET-SOC AutoCoder is a tool that can instantly provide a high-quality occupational classification for a job order, resume or claimant. Virtually all workforce systems require that job orders and applicants be classified by occupation in order to provide a suitable fit between the applicants' qualifications and the job orders' requirements.
