

Virtual OneStop[®] Veterans Portal

*Making the Transition from
Combat to Careers*

When Finding a Job is the Mission

The Virtual OneStop® Veterans Portal assists veterans and their families in making the transition from active duty to civilian-life employment. Traditionally, veterans job seekers bring strong work ethics, discipline, accountability, and added value to company culture. The Virtual OneStop® Veterans Portal serves as a gateway for services and information and matches veterans with jobs based on their military skills and Military Occupation Code (MOC). The sites also features veteran-friendly employers.

Easy Registration Process

Creating an account to search for jobs through the Veterans Portal is simple and progressive. After creating an account, job seekers can create a résumé, apply for jobs, internships, and apprenticeships, as well as find specific programs and services.

Valuable Veteran Resources

Those returning to the civilian workforce will be able to find resources geared specifically towards veterans. From the portal, veterans can locate the nearest American Job Center, and access veteran-oriented programs. They will also find direct access to the Department of Veterans Affairs website, an easy-to-use Résumé Builder, local job fairs, and training opportunities.

Career Search by Branch of Service

Veterans can use the portal to match skills they have acquired while serving to find their job or career of choice. Dropdown menus allow users to find jobs by

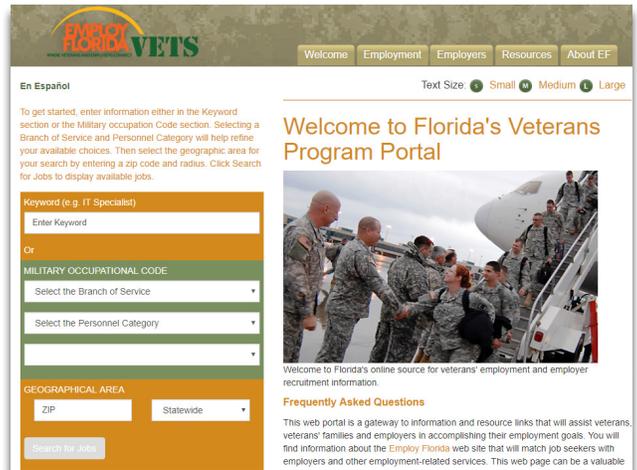

- Branch of Service
- Personnel Category
- Military Occupational Code
- Or, a combination of all three

After selecting the appropriate criteria, candidates can then narrow their search by ZIP code to find employers looking to hire right in their local area.

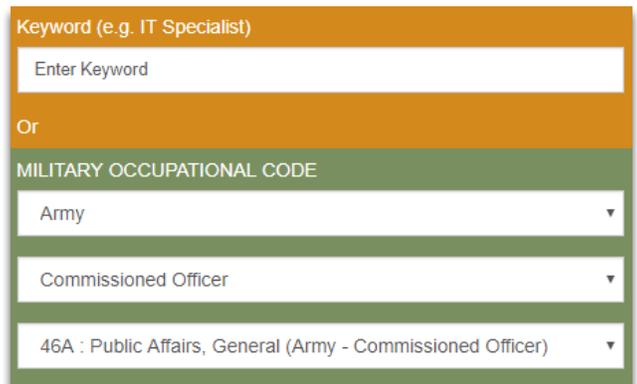

Veteran-Friendly Employer Designations

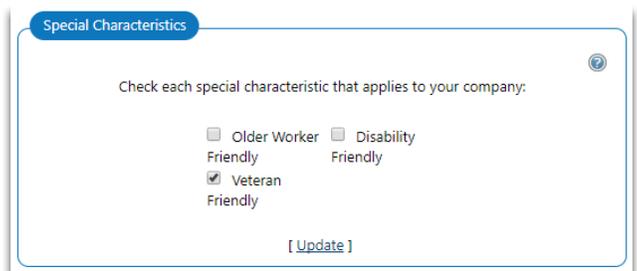

Not only will veterans find jobs based on their skill set, they will also see employers who have designated themselves as veteran-friendly. Transitioning service members seeking jobs will have the opportunity to easily find these employers within the job search results
