BEYOND ACCESS: FIXING THE VETERAN WORKFORCE SYSTEM WHERE IT ACTUALLY BREAKS

We do not have a veteran talent problem. We have a translation, alignment, and accountability problem. The system has programs, partners, job fairs, referrals, and plenty of activity, but too often it still leaves veterans underemployed and employers unprepared to convert military experience into workforce value. This session will challenge the field to move beyond access and focus on what actually drives outcomes: role alignment, employer readiness, retention, and long-term economic mobility.

A veteran-facing service model means the system adjusts to the veteran, not the other way around. Women veterans bring exceptional leadership, technical skill, and adaptability to the civilian workforce, yet they often navigate systems not designed with their experiences in mind. Many encounter identity invisibility, assumptions about their service, or pressure to “prove” their veteran status, all of which influence how they engage with workforce programs. This session will cover a strengths-based approach that acknowledges women veterans’ lived experiences and redesigns service pathways to improve trust, engagement, and employment outcomes.

THE WORKFORCE PIPELINE PLAYBOOK: WHAT LARGE EMPLOYERS WISH STATES KNEW

Everyone talks about the talent shortage. Few speak honestly about why workforce pipelines break down between states, employers, and job seekers — especially for veterans and military spouses. In this candid session, Boeing's leader for Veteran and Military Spouse Programs pulls back the curtain, shares the “secret sauce” and provides practical lessons on what works and what doesn't. While the challenges we face are daunting and real, it doesn't have to be boring! Robin is an internationally touring comedian, so you won't fall asleep and you will laugh.
